Attn: California Air Resources Board - Scoping Plan Submittals

On behalf of the Climate Protection Campaign, I would like to submit the attached word documents for the ARB AB32 Scoping Plan Solicitation (<http://www.arb.ca.gov/cc/scopingplan/spnotice.pdf>). We recommend 3 measures: cap and auction, a carbon permit fee, and Carbon Share. These three measures may be taken together or separately. Together, they would help meet the AB32 reduction goals, and fund CARB's important work in implementing AB32. Without these three measures, CARB may be faced with a long list of sector-oriented regulations, but no assurance that they will actually add up to the required reduction target. A sectoral approach may help simplify things from a technical perspective, but please remember the more systemic solutions that can address the problem across sectors and throughout the economy.

Please forward these comments to the appropriate people. The comments are for the public record. Thank you for your consideration.

Sincerely,

-Mike Sandler
